

Yvonne Hägglund, Wiveko Redovisning - transcript

What was the main reason why I might hesitate to start working with AVN?

I was educated and convinced after reading Shane's book, Putting Excellence into Practice. But I didn't have my co-owner and other half and our then office manager on the train. But that's why I signed us up for Shane's workshop in Stockholm, where all three of us could participate.

And what made me decide to go ahead with AVN?

Of course I brought them with me on the train. And that we then took the step at the workshop to make a joint journey and collaborate with AVN.

What specifically do you like about AVN's service?

What I appreciate about AVN is that they are niched in developing accountancy firms in particular. And they really understand our challenges and our needs.

And what other benefits have I discovered working with AVN?

The security of receiving professional guidance, of having a sounding board, support and for us to be able to implement the challenges that we have in front of us and that we need to get through in order to further develop our accounting firm.

Would I recommend AVN to anyone else and if so why?

Absolutely! I recommend AVN for their expertise and their professional support. Their niche expertise creates trust and confidence that we will be able to create long-term results together with them.

Is there anything else I should add?

Yes, language and translations have been a challenge for us. But with AI, everything has become much easier both for AVN and for us. And our AVN coach Emma has been a safe and positive experience all the way. And has handled our Swedish and the dialogue perfectly.

Which words would you use to describe your experience with AVN and why?

That word I would sum up, they are professional. AVN has a solution for everything and they are proactive and I can highly recommend them to anyone looking to develop their accountancy firm. Absolutely.
